DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22, drawn to apparatus for thermal testing, classified in class 374, subclass 5.
 - II. Claims 23-36, drawn to method of performing thermal testing, classified in class 374, subclass 57.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process (method) and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, Invention II does not require the particular apparatus of Invention I in that it does not require circular arrangement of samples, does not require a single sample chamber, does not require a heater and a cooler required by Invention I. Thus, the method of Invention II can be practiced with another apparatus, not necessarily the apparatus of Invention I.
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 2859

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion
